Pakedge Releases “Invincible” RB-KIT Gateway Router

Burlingame, CA – Pakedge Device & Software announced the release of the Pakedge RB-KIT - Preconfigured Router and Gateway Security Appliance. Pakedge teamed up with Fortinet to create the RB-KIT which offers complete security and high performance routing for even the most challenging installations.

Dusan Jankov, Executive Vice President of Pakedge Device & Software, remarked on the Pakedge RB-KIT saying, “Our new router device, in combination with Fortinet, is an excellent addition to the Pakedge family of quality networking devices. It has a full arsenal of security features that make it practically *invincible*. Plus, with Pakedge preconfiguration and support, the RB-KIT is a snap for custom installers.”

Security

The RB-KIT provides a full suite of security services in one robust platform including antivirus/antispymware/antimalware, intrusion prevention (IPS), web filtering, stateful firewall and traffic shaping, and IPSec/SSL VPN. All these features add up to superior protection against threats such as IM/P2P traffic, phishing and pharming, and sophisticated blended threats.

The RB-KIT gateway is unique in that security scanning is done within ASICs, or semiconductors, rather than software, which translates into increased networking speed. “With Fortinet’s excellent reputation as a leader in the security field, and Pakedge’s commanding reliability standards, your network will be safer and run more smoothly than ever,” adds Jankov.

Networking Performance

The RB-KIT comes preconfigured by Pakedge for a wide variety of applications from basic to advanced residential installations. This makes for simple, quick installation without enterprise configuration complexities for almost any project.

The RB-KIT has one Local Area Network or LAN with three ports and can be added upon to create larger, more sophisticated networks with almost no limit.

Additional features of the new RB-KIT include Basic and Advanced Settings and AV Rack mount bracket. The RB-KIT has a clean, sleek face; an ultra quiet, fanless design; and back side

cables. The RB-KIT comes with dual WAN links for reliable Internet connections that deliver higher availability and will switch over to an open connection when necessary.

The Pakedge RB-KIT can be obtained exclusively from one of many Pakedge authorized dealers.

COMPANY PROFILE: Pakedge Device and Software creates innovative networking products for people who demand performance, features, and reliability. Our products use the most advanced wireless and networking technology. They are designed for professionals to install and consumers to enjoy.
