

Pakedge Announces Kickoff of 31-City BakPak Across America Tour

Hayward, CA - Pakedge Device & Software, a leading manufacturer of networking equipment for A/V applications, will be embarking on a major product tour during the months of July through September. This tour makes 31 stops across the entire continental United States during the three-month span and provides dealers and integrators with a live and interactive forum for learning about key Pakedge networking solutions.

The BakPak Across America tour focuses on three key Pakedge solutions:

1. Building a remote monitoring and management (RMM) service with the BakPak Cloud Management System
2. Building an enterprise-grade wireless network with the C36 WAP Controller
3. Enterprise networking for small networks – the RE-1 router

The training, ideal for sales, technical and management personnel, will consist of a solution overview, key features and benefits and a live demonstration of its capabilities. The three hour training is offered twice in most cities – once in the morning, and once in the afternoon.

Attendees will receive information about special Pakedge promotional discounts, T-shirts and other unique giveaways.

Nick Phillips, Vice President of Sales at Pakedge, calls the tour “a great way to learn about important Pakedge solutions in a personalized and interactive forum. A live classroom experience gives dealers a far more effective and personalized experience than webinars and training videos do. It’s a great way to ask questions, touch and feel the solutions, and also to develop personal connections with key Pakedge personnel who can be a resource for them down the road.”

The BakPak Across American tour dates include:

Dates	Location
7/22	Huntington Beach, California
