Pakedge to Exhibit More Than 20 New Custom Installation-Friendly Networking Products at CEDIA 2013

Foster City, CA – At CEDIA 2013, Pakedge Device & Software will exhibit more than 20 new wireless and wired networking products across five product categories! All are designed to provide standard-setting performance in custom installations and smart homes and complete network integration for any size project.

Pakedge will also be featuring live product demos during the show.

Here are just some highlights of what's in store at CEDIA 2013:

Cloud Technology:

Pakedge has improved its BakPak Mobile App to provide device monitoring of Pakedge and other manufacturers' products and facilitate product configuration, AC and PoE power control and preconfigured SMS, email or mobile push-notification alerts – all from a web browser, IOS or Android devices.

BakPak is a convenient way to configure customers' systems, store and back up customer data, control system-wide power and perform other functions, all from a remote location.

The NP36 Cloud Appliance is the hardware backbone that makes BakPak possible!

Wireless:

The Pakedge W7 Dual-Band Concurrent Wireless Access Point offers simultaneous 2.4GHz and 5.0GHz operation with improved range, throughput and reliability. Its exclusive Smartwav™, TruStream™ and SectorMaxx™ technologies ensure the best-possible wireless performance for the most demanding streaming media, music and VoIP applications. Available in the W7R

rack mount version and W7O outdoor version.

We'll also be debuting our W8 professional grade, ultra-high power access point.

Winner of a CE Pro BEST award and a Technology Integrator Exc!te award, the C36 Wireless Access Point Controller makes it easier to configure and manage every wireless access point in a large network by using automated, "intelligent" configuration tools.

Infrastructure:

AV Housing Series: The S24AV Fully Managed 24-Port Gigabit Switch is created specifically for custom installation and media streaming. Winner of a Resi 2013 award from Residential Systems magazine, the S24AV facilitates easier networking setup and configuration and features Pakedge's sleek, attractive AV Housing industrial design. The new S24P16av and S8Hav switches also feature Pakedge's AV Housing design.

Front Face "Classic" Series: The S20fe and S28fe Gigabit Ethernet Switches offer simultaneous Ethernet and fiber optic connectivity – up to 28 ports worth! A host of additional network switches will make their debut including the S5Wpde, S24f, S24Hf and more, all with Pakedge's Classic front face design.

Gateway Appliances:

The new R10U, R10 and R1 Gigabit Routers provide the highest levels of custom-installation and smart home networking performance, thanks to features like TruStream™ streaming media technology and Unified Threat Management (UTM) security.

Intelligent Power:

Pakedge's new P8 and Intelligent Power Distribution Units provide the highest degree of AC power protection and comprehensive on/off power startup and shutdown capabilities including remote operation.

Accessories:

Accessories complete the look, and a networked A/V installation is no exception. Please check out our new 1U brush plate, 2U and 3U coverplates and reversible Pakshelf mounting bracket that provide a neat, finished appearance to any project.

...And we'll have even more news at the show...please stop by!

WHERE: Booth 2152, Colorado Convention Center, Denver, CO
